Wearing of the Green

It's hard to imagine a color other than green dominating St. Patrick's Day celebrations, but for centuries, blue was associated with Ireland. One reason for the color switch was the Irish Rebellion of 1798, an uprising against British rule in which Irish soldiers wore green uniforms. As made famous by the lyrics of the ballad "The Wearing of the Green," people began displaying the color as an expression of national pride.

March 2024

Message From Our Executive Director - Tom Karnes

In 2024, the spring equinox— the first day of spring—occurs on Tuesday, March 19, 2024. So, who decides that? It's not a groundhog and it's not a weatherman. It is considered to be the first day of spring because it is the predicted date the sun will have crossed the equator. In all areas throughout the world, both the length of daytime and nighttime are exactly equal. If the weather is nice, it might be a good day to enjoy our courtyard, and to welcome the return of longer days and warmer weather! Enjoy!
